DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, drawn to a method for fabricating a Fe-Si based thin film, classified in class 204, subclass 192.1.
 - II. Claims 23-27, drawn to a Fe-Si based thin film, classified in class 428, subclass 446.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by forming FeSi based film on a substrate with non-oriented crystal planes, removing the film and then transferring the film to a substrate perpendicular oriented crystal planes.
3. A telephone call was made to the law firm of Oliff & Berridge on August 9, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
